Dear Senators of Idaho,

Please show some responsibility to the residents of your state and support the Wolf Emergency Declaration bill (HB 343). This is about a whole lot more than wolves, and you all know that. It's about an element of society that wants to destroy the rural lifestyle of the Northern Rockies in order to achieve a radical green movement known as the Wildlands Project.

Attached is written testimony sent to the Montana Senate by a former U.S. Forest Service forester, which exposes this fiasco for what it really is - ONE GREAT BIG LIE!

Cast your vote on HB 343 as if your political career depends on it...because it very likely will. Residents of Idaho, Montana and Wyoming are sick and tired of the wolf idiocy. If steps are not taken by state governments to put an end to this disaster, things are very likely to turn extremely ugly.
